About

Full-stack developer with 2+ years of hands-on experience building scalable web applications using Java, JavaScript, and modern frontend technologies. Specialized in developing interactive features, database optimization, and leading cross-functional teams. Proficient in Test-Driven Development and Git-based version control. Passionate about creating efficient, user-centric solutions and staying current with emerging technologies.

Professional Experience

Systems Engineer at Tata Consultancy Services

Aug 2023 – June 2025

Future Generali Insurance

Kolkata

- Developed and maintained a dynamic, interactive website using **Java**, **JavaScript**, **JDBC**, and **PL/SQL**, ensuring seamless user experience and robust backend functionality.
- Designed and implemented a **Bulk Uploading feature** for insurance product specifications through Excel, enhancing data management and system integration capabilities.
- Took complete ownership of the **product development life cycle**, **managing UAT server functionalities**, **defect resolution**, **client communication**, and **production migration** with a focus on Test Driven Development.
- Led a team of 4 engineers in **delivering** insurance product functionalities, ensuring timely Go Live within 8 months while maintaining project timelines and utilizing **Git for version control**.

Projects

3D Portfolio Website

June 2025

- Built interactive 3D web application using **React**, **React Three Fiber (R3F)**, and **WebGL with physics-based animations**, **quaternion rotations**, and event-driven architecture for real-time responsiveness.
- Engineered modular component architecture with context-based state management, **lazy loading**, and **LOD rendering** optimization techniques for enhanced scalability and performance.
- Integrated **REST APIs with axios**, implemented responsive **Tailwind CSS Grid design**, and deployed on Netlify with CI/CD pipeline integration.

Student Management System

Feb 2023

- Architected multi-tier desktop application using MVC pattern with **Java Swing GUI** and **JDBC** for database abstraction layer implementation.
- Designed normalized MySQL schema with relational integrity, prepared statements for SQL injection prevention, and query optimization through indexing strategies.
- Implemented **CRUD operations** with transaction management, connection pooling, user authentication, role-based access control, and comprehensive input validation.

Education

Bachelor of Technology in Computer Science and Engineering

July 2019 - June 2023

Netaji Subhas Engineering College, Kolkata

CGPA: 8.59

Higher Secondary (WBCHSE)

July 2017 - May 2019

Majilpur J.M. Training School, Jaynagar

Percentage: 81.2%

Secondary (WBBSE)

May 2017

Majilpur J.M. Training School, Jaynagar

Percentage: 81.16%

Technical Skills

- **Languages:** C, C++, SQL, JavaScript, PL/SQL
- **Frontend:** HTML, CSS, React, Tailwind CSS
- **Backend & Databases:** Java, JDBC, MySQL, PL/SQL
- **Other Skills:** Data Structures, Algorithms, Object-Oriented Programming, System Design, Test Driven Development
- **Tools:** VS Code, Dev C++, NetBeans, MySQL Shell, MySQL Workbench, Git, GitHub

Certifications

- Data Structures and Algorithms
- Microsoft Azure Fundamentals (AZ-900)
