Education

Bachelor of Technology in Computer Science and Engineering	2019–2023
Maulana Abul Kalam Azad University	CGPA: 8.59
Higher Secondary (WBCHSE)	2017–2019
Majilpur J.M. Training School	Percentage: 82%

Projects

Manhwa.ai - Hybrid AI Video Platform FastAPI, Docker, Google Cloud, React	Oct 2025
- Tech Stack: Python (FastAPI), React.js, Google Cloud Run, Docker, Supabase, Google Gemini API, Tesseract OCR, FFmpeg, GitHub Actions - Engineered production-ready Docker containers to package complex system dependencies (Tesseract OCR, Poppler, FFmpeg), ensuring environment consistency. - Architected a scalable Serverless Microservices backend on Google Cloud Run, enabling auto-scaling for resource-intensive OCR and AI processing tasks. - Implemented automated CI/CD pipelines using GitHub Actions to streamline the build, testing, and deployment of containerized services to the cloud. - Integrated Supabase Object Storage as a secure CDN for high-volume media assets, configuring granular CORS policies to enable secure client-side rendering. - Developed a context-aware narrative engine using Google Gemini LLM API and FastAPI, utilizing asynchronous task execution to reduce processing latency by 40%.	
3D Portfolio Website React, Three.js, WebGL	June 2025
- Tech Stack: Developed using React.js, Three.js, React Three Fiber, and Tailwind CSS; utilized Framer Motion for UI transitions, EmailJS for contact functionality, and Vite for build optimization. - Built interactive 3D web application using React, React Three Fiber (R3F), and WebGL with physics-based animations, quaternion rotations, and event-driven architecture for real-time responsiveness. - Engineered modular component architecture with context-based state management, lazy loading, and LOD rendering optimization techniques for enhanced scalability and performance. - Integrated REST APIs with axios, implemented responsive Tailwind CSS Grid design, and deployed on Netlify with CI/CD pipeline integration.	
Real-Time Messaging & Social Application MERN	June 2023
- Tech Stack: Node.js, Express.js, MongoDB (Mongoose), Socket.io, JavaScript (ES6+), HTML5/CSS3. - Backend Development: Developed a REST API backed by MongoDB to manage user sessions, post feeds, and social graph connections (Follow/Unfollow logic). - Real-Time Features: Integrated Socket.io to power instant notifications and low-latency chat, reducing server load compared to traditional HTTP polling. - Frontend Logic: Utilized AJAX and jQuery for asynchronous data fetching, creating a Single Page Application (SPA) feel within a server-rendered environment. - Security: Enforced secure login flows with middleware protection, session persistence, and data validation/sanitization.	

Professional Experience

Systems Engineer at Tata Consultancy Services (Digital)	Aug 2023 – June 2025
<i>Future Generali Insurance (Kolkata)</i> - Developed robust RESTful APIs and backend services using Java Spring Boot and PL/SQL, ensuring high availability and seamless frontend integration. - Optimized database performance by redesigning schema structures and implementing a Bulk Uploading feature, processing large datasets 40% faster. - Managed the full SDLC, utilizing Git for version control, ensuring timely delivery of insurance product functionalities. - Collaborated with cross-functional teams to debug production issues, analyze logs, and implement security best practices for user authentication.	

Technical Skills and Interests

Front - end Development: HTML5, CSS3, JavaScript, React.js, Next.js, TypeScript, Responsive Design Back - end Development: Node.js, Express.js, Django, Spring Boot, RESTful APIs, JDBC Databases & Storage: MySQL, PL/SQL, MongoDB, Redis Tools: VS Code, Git, Docker, Kubernetes, MySQL Shell, MySQL Workbench, Dev C++, NetBeans Programming Languages: Java, Python, C, C++ Data Structures and Algorithms: Strong foundation with practical applications in Java and Python Key Competencies: System Design, Data Structures & Algorithms, AI Integration (LLM/OCR), Problem Solving, Debugging	
---	--

Certifications

- Data Structures and Algorithms (NIIT) - Microsoft Azure Fundamentals (AZ-900)
